World Population Day was established in 1989 by the Governing Council of the United Nations Development Programme — UNDP. The inspiration for this holiday was the peaking public interest in the celebration of 'Five Billion Day' on July 11, 1987. This original date was decided to be set as 'World Population Day' by the United Nations General Assembly, and resolution 45/216 made this official in December 1990.

The video is the description of World Population day made by Final year degree students. World Population Day on July 11 is dedicated to focusing on the importance of population issues. The day was established by the United Nations as a result of the massive interest people had in Five Billion Day in 1987. [Show more](#)
